EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Robert C. Peck on October 18, 2007.

The application has been amended as follows:

IN THE CLAIMS:

Claim 23, line 1, the occurrence of "21" has been changed to --14--.

Allowable Subject Matter

2. The following is an examiner's statement of reasons for allowance:

Claim 1 is allowable over the prior art of record since cited references taken individually or in combination fails to particularly disclose the merging including adding the first directed path to the second directed path in such a manner that the directed based path segments of opposite direction are removed from the merged path, the adding including determining if two path segments are between same nodes but of opposite direction, if so, removing both path segments from the merged path, and repeating the determination and removal unit until all such paths segments are removed from the merged path. Therefore, the prior art of record fails to disclose or render obvious the above underlined limitations as claimed.

Art Unit: 2616

Claim 14 is allowable over the prior art of record since cited references taken individually or in combination fails to particularly disclose the first plurality of paths including a plurality of directed paths, each directed path having direction based path segments and the arranging including combining the first plurality of paths into a merged path and dividing the merged path into the second plurality of paths, the combining including adding the first set of paths together such that paths segments of opposite directions cancel out, the combining further utilizing a substantially vector based addition. Therefore, the prior art of record fails to disclose or render obvious the above underlined limitations as claimed.

Claim 26 is allowable over the prior art of record since cited references taken individually or in combination fails to particularly disclose the merging including adding the first directed path to the second directed path to form a closed polygon, and removing any interior path segments from the closed polygon, wherein the merged path is the exterior path segments of the closed polygon. Therefore, the prior art of record fails to disclose or render obvious the above underlined limitations as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
